

In all panels and all wires the green wire is always the common (ground).

Hunter Sprinkler Panel in Garage

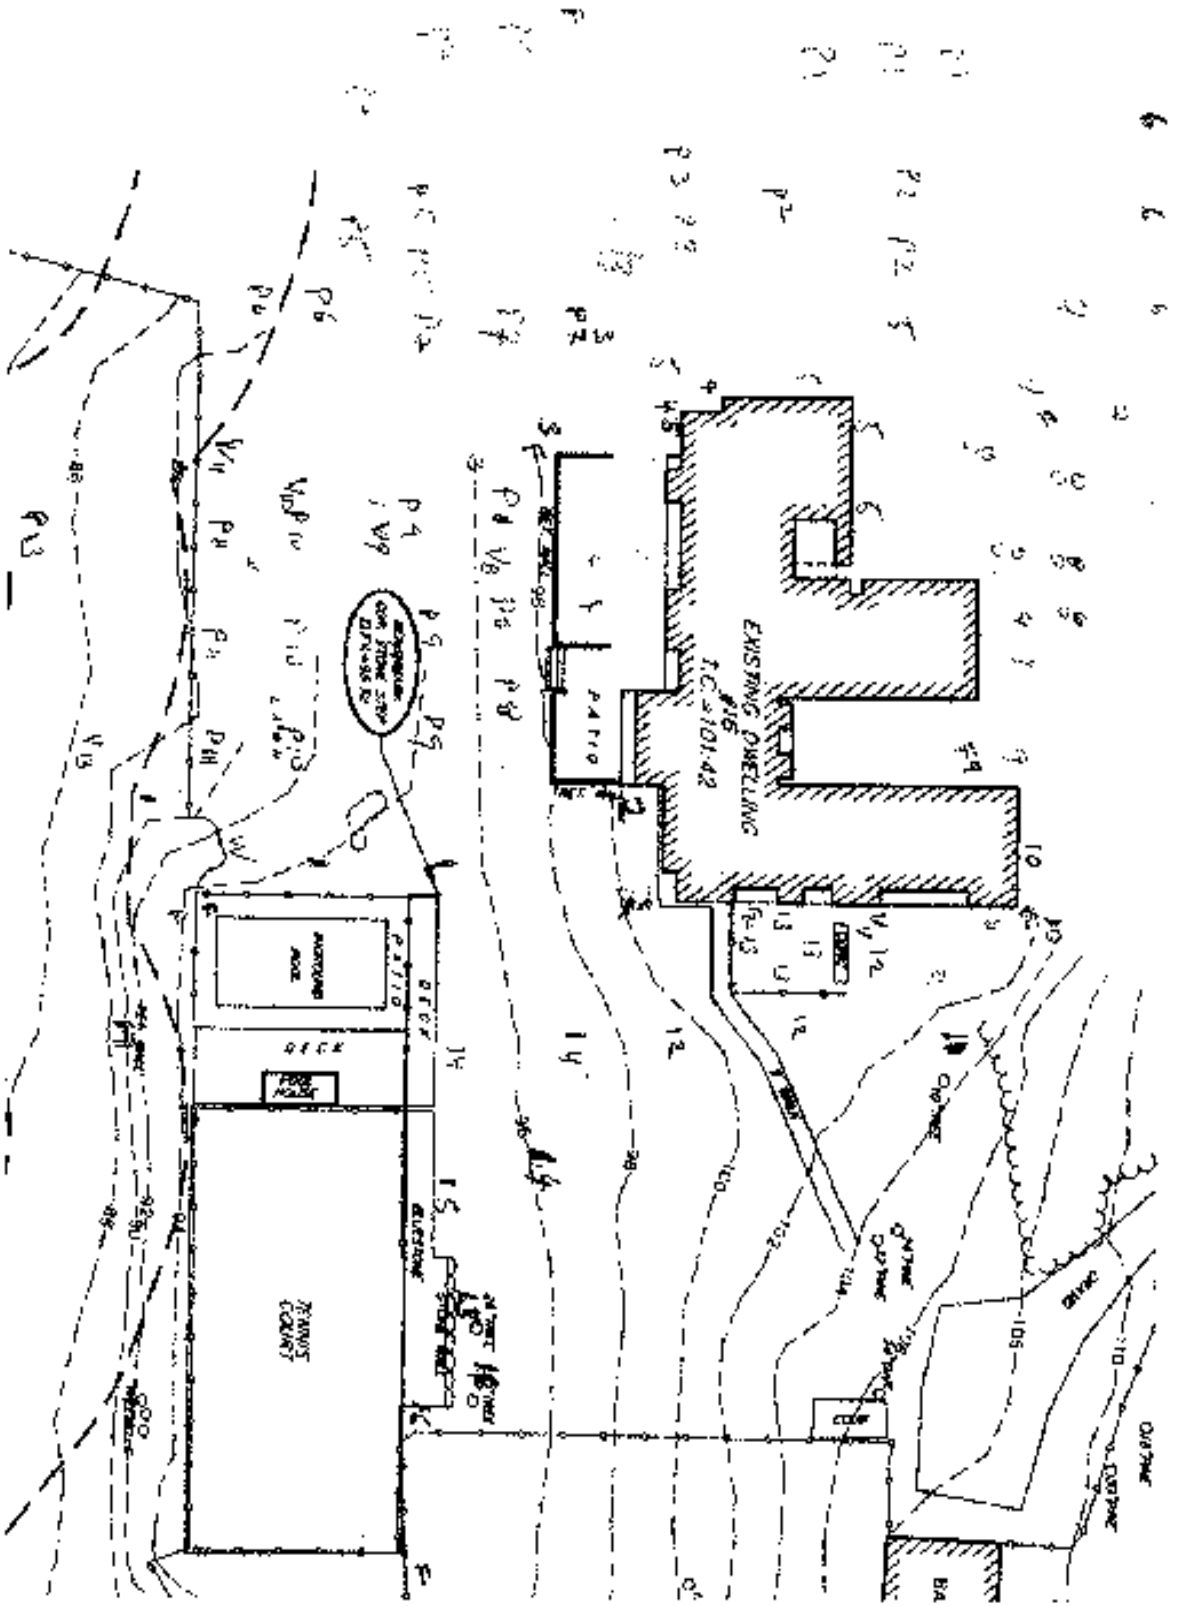

There are two wires, A and B. Twisted pairs have a colored and a black wire. White Black means the Black wire of the White Black pair. Blue on wire A and Yellow Black on B are not connected, they show open. These may have controlled the fenced garden area (now woods with a fence) north of the driveway to the barn.

Zone	Wire	Heads	Color	Purpose
16	B	2	Yellow	East end near tennis court lawn and bed
15	B	2	White	West end near tennis court

Hunter Sprinkler Panel in Pool House

There are two wires: Skinny Black (S) and **Fat Black (F)**. A grey wire was likely replaced by these and still sits behind the pool fence. A black 8 conductor wire not connected is in a box on the hill near the gate west of the pool. The skinny red wire goes to the valve box for P11, perhaps it ran drip along the wall.
